Plants

Plants

Answer the following questions while watching the video “Life: Plants”.

1. How are plants similar to animals? How are they different?
2. How are some plants, like ivy and passion-flower tendril, able to obtain sunlight when they grow from the dark forest floor?
3. Sundews live in an environment where nitrogen is lacking. How are they adapted to getting this essential nutrient, if soil does not provide it?
4. What adaptation enables a venus fly trap to “know” when to close its leaf and begin digesting its dinner?
5. Why do plants have flowers?
